Application

Powerful enzymatic detergent, for the cleaning in place, by soaking and for the cleaning of membrane installation of separation.

- Specific enzymatic formulation, which ensures the irreversible transformation of organic waste in industry.
- Its adapted enzymatic cocktail ensure an in-depth cleaning and in full safety for materials.
- Filzym P2 is particularly recommended to ensure the maintenance of membranes in order to preserve optimum outputs filtration.

Use

Food industry and water treatment.

Dosage / Instructions

from 0,5 to 2 %

Closed circuits – CIP :

- Facultative stripping during 10 minutes with an alkaline solution (Filzym K1 at 0,5 %)
- Prepare a solution of Filzym P2 diluted in hot water (40-60°C).
- Let circulate the solution in the material to be cleaned during 30 to 120 minutes according to the nature of the substrate and the importance of filling.
- Finish the circulation with a disinfecting or an acid solution (Filzym D1 0,25%) during 10 minutes.

Advantages

For more than 30 years, REALCO has been developing cleaning solutions respecting the environment. The enzymatic technology developed by REALCO is the best performing solution on the market to protect our environment and the user (patented technology : n°EP1025052, n°PCT/EP2006/060244).

- Increased cleaning performance ;
- Deep and soft cleaning due to the enzymatic action ;
- Non aggressive to the users, nor to the material ;
- Prevents pipe blocking due to its continuous action inside the pipes ;
- Without impact on the environment.
